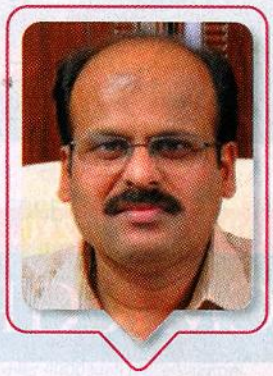
DR. L. V. NARASIMHA PRASAD,
Principal, Institute of Aeronautical Engineering, Hyderabad

The rigid and watershed compartment mode of engineering education from various affiliated colleges is highly impacting the slow and speed learners. This cannot be achieved till the colleges implement fully flexible choice-based credit system under autonomous status. Even the research component in specialized fields, catering to various aspects of technological development and economic progress is highly affected

GOPAL REDDY,
Secretary, CMR Group of Institutions, Hyderabad

The quality of education has been deteriorating, mainly for the following reasons: infrastructure which includes good equipment has been lacking in most of the engineering colleges; very good quality faculty is not available in most of the colleges and they don't have requisite experience in the field of specialization. Most of the colleges are not accredited by the accreditation bodies as well.



DR. VSK REDDY
Principal, Malla Reddy College of Engineering & Technology, Hyderabad

The existing system in India for assessing and accrediting quality of education being implemented in institutions are through National Assessment and Accreditation Council (NAAC), National Board of Accreditation (NBA) etc. Further, the running of the institutions is governed by various approving regulatory authorities such as AICTE, UGC, affiliating university. However, it is felt that there is a dire need for a common system adhering to international standards of evaluation after going through which the Indian institutions can compare with the world-class institutions in terms of quality and excellence of performance

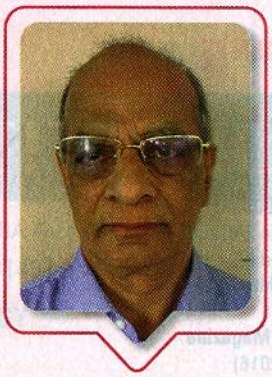
DR. S.SAI SATYANARAYANA REDDY,
Principal, Vardhaman College of Engineering, Hyderabad

There are tremendous challenges in today's global competition, and we have to ensure that one should be ready to face the challenges ahead. We must be committed to grooming this growing pool of talent so that they transformed into edupreneurs with excellence education. The objective must be to impart job-oriented courses and training in life skills to serve the young aspirants of the community by making them good citizens



DR. S.R.K.REDDY,
Professor in Civil engineering & Advisor to Management, Gudlavalleru Engineering College

Quality of engineering education mostly depends on the quality of teachers who can make students learn how to apply their analytical skills in solving real global problems. Mushrooming of many engineering colleges in the country created shortage of faculty and many are mediocre because of not updating their engineering research and practical approach
