#### I. COURSE OVERVIEW:

The primary objective of an Engineering Chemistry course is to introduce the students to the concepts and applications of chemistry in engineering. It should cultivate in them an ability to identify chemistry in each piece of finely engineered products used in households and industry. It aims to strengthen the fundamental concepts of chemistry and then builds an interface with their industrial applications. It deals with applied and industrially useful topics, such as water technology, engineering materials, electrode potential and cells, fuels, polymers and corrosion. Water and its treatment for various purposes, engineering materials such as plastics, composites, ceramic, abrasives, their preparation, properties and applications, conventional and non-conventional energy sources, nuclear, solar, various batteries, combustion calculations, corrosion and control of metallic materials.

#### II. COURSE PRE-REQUISITES:

| Level | Course Code Semester |   | Prerequisites                 |
|-------|----------------------|---|-------------------------------|
| -     | -                    | - | Basic principles of chemistry |

#### **III. MARKS DISTRIBUTION:**

| Subject               | SEE Examination | CIA<br>Examination | Total Marks |  |
|-----------------------|-----------------|--------------------|-------------|--|
| Engineering Chemistry | 70 Marks        | 30 Marks           | 100         |  |

#### IV. DELIVERY / INSTRUCTIONAL METHODOLOGIES:

| ~ | Chalk & Talk           | ✔ Quiz |          | ~ | Assignments    | × | MOOCs  |  |  |  |  |
|---|------------------------|--------|----------|---|----------------|---|--------|--|--|--|--|
| ~ | LCD / PPT              | ~      | Seminars | × | ✗ Mini Project |   | Videos |  |  |  |  |
| × | Open Ended Experiments |        |          |   |                |   |        |  |  |  |  |

#### V. EVALUATION METHODOLOGY:

The course will be evaluated for a total of 100 marks, with 30 marks for Continuous Internal Assessment (CIA) and 70 marks for Semester End Examination (SEE). Out of 30 marks allotted for CIA during the semester, marks are awarded by taking average of two CIA examinations or the marks scored in the make-up examination.

**Semester End Examination (SEE):** The SEE is conducted for 70 marks of 3 hours duration. The syllabus for the theory courses is divided into five units and each unit carries equal weightage in terms of marks distribution. The question paper pattern is as follows. Two full questions with "either" or "choice" will be drawn from each unit. Each question carries 14 marks. There could be a maximum of two sub divisions in a question.

The emphasis on the questions is broadly based on the following criteria:

| 50 % | To test the objectiveness of the concept.  |
|------|--|
| 50 % | To test the analytical skill of the concept OR to test the application skill of the concept. |

#### **Continuous Internal Assessment (CIA):**

CIA is conducted for a total of 30 marks (Table 1), with 25 marks for Continuous Internal Examination (CIE), 05 marks for Quiz/ Alternative Assessment Tool (AAT).

| Table 1: A | ssessment | pattern | for C | IA |
|------------|-----------|---------|-------|----|
|------------|-----------|---------|-------|----|

| Component          |          | Total Marks |               |  |  |
|--------------------|----------|-------------|---------------|--|--|
| Type of Assessment | CIE Exam | Quiz / AAT  | i otar wiarks |  |  |
| CIA Marks          | 25       | 05          | 30            |  |  |

#### **Continuous Internal Examination (CIE):**

Two CIE exams shall be conducted at the end of the 8<sup>th</sup> and 16<sup>th</sup> week of the semester respectively. The CIE exam is conducted for 25 marks of 2 hours duration consisting of two parts. Part–A shall have five compulsory questions of one mark each. In part–B, four out of five questions have to be answered where, each question carries 5 marks. Marks are awarded by taking average of marks scored in two CIE exams.

#### **Quiz / Alternative Assessment Tool (AAT):**

Two Quiz exams shall be online examination consisting of 25 multiple choice questions and are be answered by choosing the correct answer from a given set of choices (commonly four). Marks shall be awarded considering the average of two quizzes for every course. The AAT may include seminars, assignments, term paper, open ended experiments, five minutes video and MOOCs.

#### VI. HOW PROGRAM OUTCOMES ARE ASSESSED:

|      | Program Outcomes (POs)   | Strength | Proficiency<br>assessed by |
|------|--|----------|----------------------------|
| PO 1 | Engineering knowledge: Apply the knowledge of                    | 2        | Seminar                    |
|      | mathematics, science, engineering fundamentals, and an           |          |                            |
|      | engineering specialization to the solution of complex            |          |                            |
|      | engineering problems.  |          |                            |
| PO 2 | Problem analysis: Identify, formulate, review research           | 1        | Seminar                    |
|      | literature, and analyze complex engineering problems reaching    |          |                            |
|      | substantiated conclusions using first principles of mathematics, |          |                            |
|      | natural sciences, and engineering sciences                       |          |                            |
|      | Environment and sustainability: Understand the impact of         | 2        | Presentation on            |
| PO 7 | the professional engineering solutions in societal and           |          | real-world                 |
| PO / | environmental contexts, and demonstrate the knowledge of,        |          | problems                   |
|      | and need for sustainable development.                            |          | -                          |
|      |  | •        |                            |

**3** = High; **2** = Medium; **1** = Low

#### VII. HOW PROGRAM SPECIFIC OUTCOMES ARE ASSESSED:

|       | Program Specific Outcomes (PSOs)                               | Strength | Proficiency<br>assessed by |
|-------|--|----------|----------------------------|
| PSO 1 | Professional Skills: The ability to research, understand and   | 1        | Seminar                    |
|       | implement computer programs in the areas related to            |          |                            |
|       | algorithms, system software, multimedia, web design, big data  |          |                            |
|       | analytics, and networking for efficient analysis and design of |          |                            |
|       | computer-based systems of varying complexity.                  |          |                            |
| PSO 2 | Problem-Solving Skills: The ability to apply standard          | -        | -                          |
|       | practices and strategies in software project development using |          |                            |
|       | open-ended programming environments to deliver a quality       |          |                            |
|       | product for business success.                                  |          |                            |
| PSO 3 | Successful Career and Entrepreneurship: The ability to         | -        | -                          |
|       | employ modern computer languages, environments, and            |          |                            |
|       | platforms in creating innovative career paths, to be an        |          |                            |
|       | entrepreneur, and a zest for higher studies.                   |          |                            |

**3** = High; **2** = Medium; **1** = Low

#### VIII. COURSE OBJECTIVES (COs):

| The co | The course should enable the students to:  |  |  |  |  |  |  |  |  |  |
|--------|--|--|--|--|--|--|--|--|--|--|
| Ι      | Apply the electrochemical principles in batteries.   |  |  |  |  |  |  |  |  |  |
| II     | Understand the fundamentals of corrosion and development of different techniques in corrosion control. |  |  |  |  |  |  |  |  |  |
| III    | Analysis of water for its various parameters and its significance in industrial, applications.         |  |  |  |  |  |  |  |  |  |
| IV     | Improve the fundamental science and engineering principles relevant to materials.                      |  |  |  |  |  |  |  |  |  |

## IX. COURSE LEARNING OUTCOMES (CLOs):

| CLO<br>Code  | CLO's                | At the end of the course, the student will have the ability to:                           | PO's<br>Mapped | Strength of<br>Mapping |
|--------------|----------------------|---|----------------|------------------------|
| AHS005.01    | CLO 1                | Extrapolate the knowledge of electrolytic cell,   | PO 1           | 3                      |
|              |                      | electrochemical cell, electrode potential and   |                |                        |
|              |                      | reference electrodes.   |                |                        |
| AHS005.02    | CLO 2                | Use of primary and secondary batteries in   | PO 1           | 1                      |

#### XIII. SYLLABUS

| Unit-I  | ELECTROCHEMISTRY AND BATTERIES  |
|---|---|
| conductance<br>Electrode p<br>Calomel el  | mistry: Basic concepts of electrochemistry; Conductance: Specific, equivalent and molar<br>ee and effect of dilution on conductance; Electrochemical cells: Galvanic cell (daniel cell);<br>potential; Electrochemical series and its applications; Nernst equation; Types of electrodes:<br>ectrode, quinhydrone electrode; Batteries: Classification of batteries, primary cells (dry cells)<br>ary cells (lead-acid battery, Ni-Cd cell), applications of batteries, numerical problems.   |
| Unit-II   | CORROSION AND ITS CONTROL   |
| electrochem<br>and nature<br>methods: C<br>Surface coa                              | Introduction, causes and effects of corrosion; Theories of corrosion: Chemical and nical corrosion with mechanism; Factors affecting the rate of corrosion: Nature of the metal of the environment; Types of corrosion: Waterline and crevice corrosion; Corrosion control Cathodic protection- sacrificial anodic protection and impressed current cathodic protection; atings: Metallic coatings, methods of application of metallic coatings-hot dipping(galvanizing, ectroplating(copper plating); Organic coatings: Paints, its constituents and their functions.  |
| Unit-III  | WATER TECHNOLOGY  |
| hardness: 7<br>and perman<br>method; Bo<br>Treatment<br>conditionin<br>specificatio | urces and impurities of water, hardness of water, expression of hardness-units; Types of<br>Femporary hardness, permanent hardness and numerical problems; Estimation of temporary<br>nent hardness of water by EDTA method; Determination of dissolved oxygen by Winkler's<br>biler troubles: Priming, foaming, scales, sludges and caustic embrittlement.<br>of water: Internal treatment of boiler feed water- carbonate, calgon and phosphate<br>ag, softening of water by Zeolite process and Ion exchange process; Potable water-its<br>ons, steps involved in the treatment of potable water, sterilization of potable water by<br>n and ozonization, purification of water by reverse osmosis process.                        |
| Unit-IV   | MATERIALS CHEMISTRY   |
| co-polymer<br>Preparation<br>Natural ru<br>Characteris<br>reinforced<br>Lubricants: | chemistry: Polymers-classification with examples, polymerization-addition, condensation and<br>rization; Plastics: Thermoplastics and thermosetting plastics; Compounding of plastics;<br>a, properties and applications of polyvinyl chloride, Teflon, Bakelite and Nylon-6, 6; Rubbers:<br>abber its process and vulcanization; Elastomers: Buna-s and Thiokol rubber; Fibers:<br>stics of fibers, preparation properties and applications of Dacron; Characteristics of fiber<br>plastics; Cement: Composition of Portland cement, setting and hardening of Portland cement;<br>c Classification with examples; Properties: Viscosity, flash, fire, cloud and pour point;<br>es: Characteristics and classification with examples. |
| Unit-V  | FUELS AND COMBUSTION  |
| coal: Proxi<br>catalytic cr<br>and applic<br>Value(GCV                              | hition, classification of fuels and characteristics of a good fuels; Solid fuels: Coal; Analysis of<br>imate and ultimate analysis; Liquid fuels: Petroleum and its refining; Cracking: Fixed bed<br>racking; Knocking: Octane and cetane numbers; Gaseous fuels: Composition, characteristics<br>rations of natural gas, LPG and CNG; Combustion: Calorific value: Gross Calorific<br>V) and Net Calorific Value(NCV), calculation of air quantity required for complete combustion<br>nerical problems.   |

#### **XIV.COURSE PLAN:**

The course plan is meant as a guideline. Probably there may be changes.

| Lecture<br>No | Topics to be covered  | CLOs  | Reference          |
|---------------|---|-------|--------------------|
| 1             | Understands the concept of electrochemistry. Differentiate the electronic conductors and electrolytes.  | CLO 1 | T1:5.1,6.3         |
| 2             | Define the terms specific, equivalence and molar conductance. Explain the dilution effect on these conductance  | CLO 1 | T1:5.5             |
| 3             | Understands the concept of specific, equivalence and molar conductance. Define the EMF of the cell. Demonstrate the Daniel cell.                      | CLO 1 | T2:6.1,6.2,<br>6.3 |
| 4             | Describe the construction and chemical reactions of different<br>electrodes.<br>Use the Calomel   | CLO 1 | T2:11,12.2.1       |
| 5             | Quinhydrone electrodes in calculation of potential of the single electrode.   | CLO 1 | T1:6.7(4)          |
| 6             | Derive the relation between cell reaction and emf of the single electrodes.   | CLO 1 | T2:3.4             |
| 7             | Use the standard potential values of elements from electrochemical series.  | CLO 1 | T2:5,5.1           |
| 8             | Define the battery; differentiate the primary and secondary batteries. Demonstrate the construction of the dry cell.                                  | CLO 2 | T2:16,17.1         |
| 9             | Identify the anode, cathode and electrolyte in different types<br>of secondary batteries. Employ the applications of different<br>types of batteries. | CLO 2 | T2:17.3            |
| 10            | Identify the anode, cathode and electrolyte in different types<br>of secondary batteries. Employ the applications of different<br>types of batteries. | CLO 2 | T2:17.4            |
| 11            | Define corrosion and its disadvantages.   | CLO 3 | T2:1.1             |
| 12            | Explain the mechanism of oxidation corrosion when dry gases attack on metal.  | CLO 3 | T2:2.1             |
| 13            | Explain the mechanism of hydrogen evolution type and oxygen absorption type corrosion.  | CLO 3 | T2:2.2             |
| 14            | Distinguish the types of corrosion.   | CLO 3 | T2:2.4.5           |
| 15            | Analyze the effect of different factors on rate of corrosion.   | CLO 3 | T2:5,5.1,5.2       |
| 16            | Explain the process of cathodic protection with examples.   | CLO 4 | T2:6.4             |
| 17            | Use the methods of application of metallic coatings and<br>Relate the galvanization and tinning   | CLO 4 | T1:17.1            |
| 18            | Explain the process of electroplating.<br>Apply the organic coatings for control of corrosion.  | CLO 4 | T1:8.6<br>T2:6.3.3 |
| 19            | List the various sources of water, Differentiate the temporary<br>and permanent hardness and give its units.  | CLO 5 | T2:3,4,5           |
| 20            | Calculate the total, permanent and temporary hardness of  | CLO 5 | T2:6               |

| Lecture<br>No | Topics to be covered   | CLOs   | Reference                           |
|---------------|--|--------|-------------------------------------|
|               | sample hard water by using EDTA  |        |                                     |
| 21            | Calculate the dissolved oxygen in water by Winkler's method  | CLO 5  | T1:1.14(4)                          |
| 22-23         | Recognize the boiler troubles.   | CLO 5  | T2:9.2,9.5                          |
| 24            | Discuss the internal treatment methods of boiler feed water.<br>Name the different chemicals used in internal treatment.   | CLO 6  | T2:12,12.4, 12.2,12.3               |
| 25            | Explain the process of zeolite and analyze the advantages and disadvantages.   | CLO 6  | T2:11.2                             |
| 26            | Explain ion-exchange process.  | CLO 6  | T2:11.3,13                          |
| 27            | Demonstrate the treatment of potable water Purification of potable water. Describe the process of reverse osmosis  | CLO 6  | T2:13,14 (d)                        |
| 28            | Define monomer and polymer Explain the mechanism of different types of Chain and step growth polymerization.   | CLO 7  | T2:2,2.2,4,4.<br>1,4.2,4.7          |
| 29            | Distinguish the thermoplastic and thermo set plasitcs.<br>Illustrate the compounding of plastics.  | CLO 7  | T1:3.14,3.1<br>3.12                 |
| 30            | Identify the preparation, properties and applications of different thermo and thermo set plastics.   | CLO 8  | T2:2.3,2.7,2.<br>8                  |
| 31            | Identify the preparation, properties and applications of thermo<br>set plastics. Explain about natural rubber.   | CLO 8  | T2:3,3.1,3.2,<br>3.3                |
| 32            | Explain the preparation, properties and applications of synthetic rubbers.   | CLO 8  | T1:3.24<br>T2:4.2                   |
| 33            | Explain the preparation, properties and applications of fibers.  | CLO 8  | T1:3.28<br>R4:114                   |
| 34            | Generalize the process of setting and hardening reactions of cement  | CLO 9  | T2:9.3.2,<br>9.3.3                  |
| 35            | Define the term lubricant and it's classification.   | CLO 10 | T2:7.4                              |
| 36            | Compare the different types of lubricants based on their properties.   | CLO 10 | T2:7.5                              |
| 37            | Name the different types of refractories. Discuss the characteristics and applications of refractories.  | CLO 11 | T2:8.2,8.3                          |
| 38            | Define the fuel with examples.<br>Categorize the different types of fuels.   | CLO 12 | T2:5.2,5.3                          |
| 39            | Analyze the different types of coals.<br>Explain the significance of proximate analysis of coal.   | CLO 12 | T2:5.7,5.8,5.<br>8.1                |
| 40            | Explain the significance of Ultimate analysis of coal.   | CLO 12 | T2:5.8.2                            |
| 41            | Identify the chemical constituents of petroleum.<br>Describe the refining of petroleum. Define the term cracking.<br>Distinguish the fixed bed and catalytic cracking. | CLO 13 | T1:2.18,2.19<br>2.19(a)             |
| 42            | Evaluate the octane and cetane rating of the petrol and diesel.  | CLO 13 | T1:2.23                             |
| 43            | Identify the chemical constituents of the gaseous fuel.<br>Discuss the characteristics of natural gas. Compare the LPG and CNG.  | CLO 14 | T1:2.28,2.26<br>T2:5.14.1<br>R4:247 |
| 44            | Explain the combustion process of different chemical constituents present in the fuel.<br>Differentiate the HCV and LCV.   | CLO 15 | T2:5.4,5.5                          |
| 45            | Evaluate the air quantity required for complete combustion of fuel.  | CLO 15 | T2:5.4.1, 6.5                       |

| S No | Description                                 | Proposed<br>actions | Relevance with<br>POs | Relevance with<br>PSOs |
|------|---|---------------------|-----------------------|------------------------|
| 1    | Galvanic cell, batteries-lead acid          | Seminars /          | PO 1                  | PSO 1                  |
|      | cells, Crevice corrosion, cathodic          | Guest               |                       |                        |
|      | protection, galvanizing,                    | Lectures /          |                       |                        |
|      | Electroplating.                             | NPTEL               |                       |                        |
| 2    |   | Seminars /          | PO 1                  | PSO 1                  |
|      | Softening techniques, plastics,             | Guest               |                       |                        |
|      | cement, refining of petroleuim.             | Lectures /          |                       |                        |
|      |   | NPTEL               |                       |                        |
| 3    | Thiokol rubber, EDTA method,                | Assignments         | PO 1                  | PSO 1                  |
|      | Dissolved oxygen, Viscosity, P <sup>H</sup> | / Laboratory        |                       |                        |
|      | meter.                                      | Practices           |                       |                        |

### XIV. GAPS IN THE SYLLABUS - TO MEET INDUSTRY / PROFESSION REQUIREMENTS:

#### **Prepared by:**

Ms. V Anitha Rani, Associate Professor

# HOD, FRESHMAN ENGINEERING
