C. Center of Excellence:

Center of Excellence in Cloud Computing (Aneka Cloud Platform)

Center for Cloud Application Development

The Center provides students and researchers with a specialized environment to explore and implement cloud computing technologies using both the Aneka and Microsoft Azure platforms.

Aneka is a flexible and scalable cloud application platform that enables the development and deployment of distributed applications across private or public cloud infrastructures. It offers powerful APIs and tools to efficiently utilize a network of physical and virtual resources.

In parallel, Microsoft Azure Cloud provides a comprehensive suite of services including Infrastructure-as-a-Service (IaaS), Platform-as-a-Service (PaaS), and Software-as-a-Service (SaaS), allowing users to design, deploy, and manage cloud-based applications at scale.

The center focuses on experiential learning and hands-on experimentation in both Aneka and Azure environments. It promotes research and collaboration in key areas such as cloud resource management, distributed computing, virtualization, and scalable application development. The primary objective is to prepare students with the skills and knowledge required to build, deploy, and optimize cloud-based solutions for industrial and research applications while contributing to innovative projects and high-quality publications.

Activities

Some of the core activities carried out in the lab include:

- **Hands-on Cloud Platform Training** – Students work with the Aneka SDK and tools to develop and deploy applications using cloud resources (virtual machines, containers, desktop CPU cycles).
- **Project Work in Cloud Development** – Undertaking projects that involve building distributed applications (e.g., using MapReduce, task-models, elastic scaling) via the Aneka framework.
- **Research & Publication Efforts** – Faculty and students collaborate to conduct studies on cloud resource management, virtualization, distributed systems, and publish in reputed journals/conferences.
- **Industry-oriented Collaboration** – Engaging with industry or external partners to apply cloud platforms for real-world use-cases, and to understand technology transfer, commercialization and practical deployment.
- **Seminars, Workshops & Skill Enhancement** – Conducting sessions on cloud computing fundamentals, virtualization, resource provisioning, monitoring and management tools.
- **Capstone and Mini Projects** – Final year and elective students use the lab for capstone work that may involve setting up private clouds, experimenting with resource scheduling, and exploring edge/cloud hybrids.

Objectives:

- To provide a hands-on environment for understanding cloud computing architecture, models, and services using the Aneka platform

- To develop problem-solving ability through real-time cloud application development in .NET / Java
