Abstract:

An efficient methodology to manage the bio-medical wastes collected from hospitals and diagnostic centers aims at designing and implementing a fi
wastes from various places such as hospitals, laboratories, nursing homes etc. The invention focuses on disposing of the bio-medical wastes in a saf
causing any harm to the environment as well as the humans. It is implemented using a device and an innovative incinerator. The device will identify t
them as wet and dry waste. The device will monitor the wastes. The device will monitor the wastes from various places over cloud.

Complete Specification

Claims:WE CLAIM

1. An efficient methodology to manage the bio-medical wastes collected from hospitals and diagnostic centers comprises of
a waste collection unit; centralized dumping unit; Monitoring and segregation; incinerator and
a cloud server.
2. An efficient methodology to manage the bio-medical wastes collected from hospitals and diagnostic centers, according to claim 1, includes a w
wherein the waste collection unit are placed at various locations such as hospitals, laboratories, diagnostic centers etc. and the unit will alert the cl
up to the brimming level.
3. An efficient methodology to manage the bio-medical wastes collected from hospitals and diagnostic centers, according to claim 1, includes a c
wherein the centralized dumping unit is the collective waste tank that holds bio-medical wastes that are collected from various places.
4. An efficient methodology to manage the bio-medical wastes collected from hospitals and diagnostic centers, according to claim 1, includes a n
