Abstract:

The article describes the nature of employees' personal data in human resource management systems and reviews protection and security issues. These systems are an organization's personnel management because of the threat of workers' personal data being disclosed. The purpose of the study is to analyse the experience of countries in the areas of protection and security of workers' personal data and legislation related to that topic. The best practices in the protection of workers' personal data indicate the necessity of appropriate development of regulations within any organization. The theory is based on new ideas about the information which is characterized by constant changes. Access to the right data at the right time can enable the democratization of analytics, meaning HR team members can gain and inform business decisions across their function.
