Abstract:

With the onset of Covid-19, almost every sector of economy has been adversely affected with education sector being no exception. This paper explores the use of ICT management and organization of knowledge and the application of the same. The various technologies that are available and the ones that are being developed to cater to the needs of different classes of students, keeping in view the digital divide prevalent in India. The challenges involved in the digitalization of education and the need for the available technologies and platforms that would help us in transition from the conventional education to new avenues of online learning in line with the changes inevitable in the education sector in India, given the challenges in the external environment.
