Abstract:

ABSTRACT ANALYSIS OF METHODS AND SYSTEM FOR DEVELOPING COMMUNICATIVE LANGUAGE PROFICIENCY IN ENGLISH This paper presents an analysis of existing and systems for developing communicative language proficiency in English. The analysis draws upon a survey of relevant literature, with a focus on investigating the assessment criteria of established practices on developing communicative language proficiency in English. Three categories of methods and systems are discussed as (1) traditional classroom-based approaches; (2) modern technology-based approaches; and (3) alternative approaches. This abstract discusses the analysis of method systems for developing communicative language proficiency in English. The development of this proficiency is an important factor in effectively engaging with the global community. These methods and systems can be broadly categorised into three main categories: online teaching and learning, blended learning methods and i learning programmes. Online teaching and learning uses digital platforms to bring experience-based educational activities and materials to students. Blended learning the use of traditional face-to-face settings with group activities and online tools. Finally, immersive learning programmes involve immersing students in a target language environment for extended periods of time. The analysis of these methods and systems explores how each approach can be used to promote development in communicative language proficiency in English, focusing on both advantages and drawbacks. Through the analysis, implications for pedagogical practice are also discussed. An exploratory study on the strengths, weaknesses, and potential areas of improvement of each method is conducted, noting that, while there are definitely aspects to be improved, each method has a unique set of benefits and potential for developing communicative language proficiency. Guidelines for designing effective communicative language instruction are discussed. Finally, concluding remarks are offered on the importance of informed teaching approaches in promoting communicative language proficiency.
