Invention Title	HYBRID AI SYSTEM FOR MULTI-MARKET INVESTMENT OPTIMIZATION IN STOCKS AND CRYPTOCURRENCIES
Publication Number	11/2025
Publication Date	14/03/2025
Publication Type	INA
Application Number	202541018330
Application Filing Date	02/03/2025
Priority Number	
Priority Country	
Priority Date	
Field Of Invention	COMPUTER SCIENCE
Classification (IPC)	G06Q0020060000, G06Q0040060000, G06Q0020380000, H04L0009320000, H04L0009000000

Inventor

Name	Address	Country
Dr. Dharmananda M	Associate Professor, Department of Management Studies, Nitte Meenakshi Institute of Technology, Bengaluru-64	India
S. R.Anantha Lakshmi	Associate Professor, Department of Mathematics, Easwari Engineering College, Chennai, 600089.	India
Dr.Prabhakar K	Assistant Professor,Department of CSE(AI&ML),School of Engineering and Technology,CMR University,Bengaluru,Karnataka-562149,India	India
Ms. Pokala Bhargavi	Assistant Professor, Department of CSE(AI&ML), GMR Institute of Technology, Rajam, 532127	India
Madhavidevi Botlagunta	Assistant Professor,Department of Computer Science and Engineering, Institute of Aeronautical Engineering, Dundigal, Hyderabad- 500043	India
Dr Chandrabhan Makode	Assistant Professor, Department of Physics , Government Motilal Vigyan Mahavidyalaya, Bhopal Pin 462008	India
Malarkodi Valentina.K	Assistant Professor, Department of Mathematics, Velalar College of Engineering and Technology, Erode-12	India
B.Kavitha	Assistant Professor, Department of MCA, Excel Engineering College(Autonomous), Komarapalayam, Namakkal 638183	India
Dr.S.Balakrishna	Professor,Dept.of Mathematics,Sri Venkateswara Colleges of Engineering	India
Dr. Sakina Tanveer Alware	Assistant professor , commerce and Management Department, chhatrapati Shivaji Maharaj University, panvel, 410208	India
Pitcheri Praveen Kumar	Assistant Professor, Electronics and Communication Engineering,Anurag University,Hyderabad,500088	India
Dr. Mohd Asif Shah	Dean, Faculty of Economics, Kardan University, Parwan-e-Du, 1001, Kabul, Afghanistan	India

Abstract:

Hybrid AI System for Multi-Market Investment Optimization in Stocks and Cryptocurrencies is the proposed invention. The proposed invention focuses on understand functions of Cryptocurrencies. The invention focuses on analyzing the parameters of Multi-Market Investment Optimization in Stocks using algorithms of AI Approach

Complete Specification

Description:[0001]   Background description includes information that may be useful in understanding the present invention. It is not an admission that any of th information provided herein is prior art or relevant to the presently claimed invention, or that any publication specifically or implicitly referenced is prior art.

[0002]   Hybrid AI is a method of combining machine learning, which uses statistical models to analyze data, and symbolic AI, which is semantic-based and provide insights into meaning. By using the strengths of each technique, an outcome can be achieved that is more powerful than would be achievable by either one alone. O the real world applications for hybrid AI is in financial data discovery. The goal is to automate the extraction of information about financial assets, to bring efficiency office processes and scale data creation.

[0003]   A number of different types of multi-market analysis systems that are known in the prior art. For example, the following patents are provided for their sup teachings and are all incorporated by reference.

[0004]   US10607141B2: The apparatuses, methods and systems for a digital conversation management platform ("DCM-Platform") transforms digital dialogue fro consumers, client demands and, Internet search inputs via DCM-Platform components into tradable digital assets, and client needs based artificial intelligence cam plan outputs. In one implementation, The DCM-Platform may capture and examine conversations between individuals and artificial intelligence conversation agent agents may be viewed as assets. One can measure the value and performance of these agents by assessing their performance and ability to generate revenue fror prolonging conversations and/or ability to effect sales through conversations with individuals.

[0005]   "Multi-Market Investment Optimization" refers to the process of strategically allocating investments across multiple different markets or asset classes, aim maximize potential returns while minimizing risk by diversifying across various market conditions, using mathematical models to find the optimal asset allocation b
